Technical Information

SBF – 931 SCALE BAN FOAMER

PRODUCT DESCRIPTION

SBF – 931 is a high temperature scale inhibitor, surfactants and dispersing agent. The foaming effect will help deposit scale inhibitor all the way through the production system.

PRODUCT FEATURES

SBF – 931 contains chemicals that help prevent carbonate types of scale from depositing down holes in gas wells, casing, tubing, and flow lines. It is also very useful to include **SBF - 931** in this type of treatment since the **SBF - 931** will help remove carbonate types of scale after being deposited and also neutralizing scale that is in the solution.

PRODUCT ADVANTAGES

SBF – 931 treatment varies with the volume of water being produced and should be adjusted for high volume wells. In many cases 1- 2 gallons every other day may be sufficient. Occasional use of **S I Stix - 881** will also be helpful. For sufficient use, **SBF – 931** should be placed as close as possible to the source of scaling water. **SBF – 931** is non-toxic, but should be handled and treated like any chemical product. Avoid contact with eyes and skin. Dispose of **SBF – 931** in prescribed manner according to local and federal regulations.

STORAGE AND HANDLING

SBF – 931, a scale inhibitor foamer, is available in 5 gallon plastic pails, 55 gallon drums and 275 gallon totes. As with any industrial chemical, avoid prolong contact with the skin. In case of skin or eye contact, flush the exposed area with copious amounts of water. A material safety data sheet outlining proper handling of this product is available upon request or will be forwarded upon the purchase of **SBF – 931**. Avoid getting **SBF – 931** in eyes, on skin or on clothing. Wash thoroughly after handling. Soiled clothing should be removed and laundered before reuse.
