Technical Information

SC STIX – 741 Sand Control

PRODUCT DESCRIPTION

SC STIX – 741 contains a blend of chemicals that are specifically designed to convert dense sludge and silt deposits into light non adherent agglomerates that permit easy dispersion. The foaming effect is added to produce desired de-liquidity and lift of water from down hole in the flowing well. This process will help in the removal and unloading of solids from down hole in the producing well to the surface where they can be handled in a more conventional and economical manner.

PRODUCT FEATURES

SC STIX – 741 is a blend of water soluble based chemicals composed of dispersing agents, sequestering agents, various surfactants and foaming agents all combined together. As the liquid blend migrates in the fluids down hole it begins to disperse and sequestering the silts and sludge down hole, lifting the fluids and solids to the surface.

RECOMMENDED APPLICATION

Treatment using the **SC STIX – 741** varies from well to well depending of the amount of water and volume of sludge down hole and should be adjusted accordingly. In many cases .005% to 0.5% based on total fluid down hole to be treated, have proven to be effective by either continuous injection or batch treatments. This treatment may need to be repeated for a couple days until the silts and sludge have been removed from down hole. Treatments thereafter may be reduced, as well as treatment rates as need to prevent any further silt or sludge build up down hole. Suspended solids in the produced fluids can be tested periodically to determine the effectiveness of the treatment applications.

For sufficient use, the liquid blend should be placed as close as possible to the source of silts and sludge down hole.

STORAGE AND HANDLING

SC STIX – 741 are non-toxic, but should be handled and treated like any chemical product. Always try to use gloves to avoid contact with hands. As with any industrial chemical, keep out of reach of children and avoid prolonged contact with skin. A material safety data sheet outlining proper handling of this product is available upon request, or will be forwarded upon the purchase of **SC STIX – 741**.
